

# **Space Acceleration Measurement System-II Crew Familiarization Briefing - Science**

**Kevin McPherson**  
**Principal Investigator Microgravity Services Project Manager**  
**NASA Glenn Research Center**  
**Phone: (216) 433-6182**  
**Fax: (216) 433-8660**  
**E-mail: Kevin.McPherson@grc.nasa.gov**

- Program provides acceleration measurement support to microgravity principal investigators
  - develop and operate accelerometer systems for microgravity research platforms
  - analyze and interpret accelerometer data to characterize the microgravity environment of the research platforms for principal investigators
  - support microgravity environment requirement activities
- Acceleration measurement WWW links
  - <http://microgravity.grc.nasa.gov>
  - [http://microgravity.grc.nasa.gov/MSD/MSD\\_htmls/accel\\_meas.html](http://microgravity.grc.nasa.gov/MSD/MSD_htmls/accel_meas.html)

  - <http://tsccrusader.grc.nasa.gov/pims>

- Purpose
  - To analyze and interpret accelerometer data to characterize the microgravity environment of Earth-orbiting laboratories for the microgravity principal investigators
  - Maintain archive of acceleration data from various microgravity platforms including ISS, MIR, Space Shuttle, KC-135, and sound rockets
  - Approach
    - Throughout the PI's preparation for flight, the PIMS team will offer tutorial sessions and one-on-one interaction to help the PI team understand different aspects of measuring and interpreting the microgravity environment
    - Following the acquisition of accelerometer data, the PIMS team will provide expert consultation on interpretation of the microgravity environment and perform detailed analyses for general characterization and on a per-request basis

## Example Figures
